Experience

UI Designer and Software Engineer, Figma Plugin, Jan 2025 -Present

Designed and coded a **Figma plugin** that allows users to **search for font pairs** based on a desired **emotional tone** and **save font pairs as text styles** in Figma with a single click.

Collaborated with a developer to **build a secure endpoint** for protecting **Google API key information**.

Coded the plugin using **JavaScript, HTML, and CSS.**

UX Designer and Project Manager, Synergy, Apr 2024-Present

Led UX design and project management efforts, using **Jira** to plan sprints and **Figma** for wire-framing, prototyping, and collaboration.

Developed a comprehensive **research plan** outlining competitor analysis, target users, SMART objectives, and feature requirements.

Conducted **user interviews** and analyzed usability test data in **Dovetail** to generate user stories and refine user flows.

Created **SWOT-based competitive analysis** to identify market positioning opportunities.

Designed interactive **wireframes and prototypes**, translating user flows into functional designs for developers.

UX Designer and Project Manager, Freelance, Jul 2024 - Aug 2024

Held **weekly meetings with the stakeholder client** to provide progress updates, present recommendations, and clarify project requirements.

Conducted **user interviews with salon customers** and performed **competitive analysis** by benchmarking against 5-star-rated salons.

Wire-framed and prototyped in Figma, collaborating closely with the developer through **Figma Dev**, delivering the project within a **5-week timeline**.

Education

University of Texas - Arlington

BS in University studies with a focus in Art and Business

Career Foundry

User Experience Design and User Interface Design Certificate

Design Skills	Planning and conducting user Interviews
	Prototyping for testing and communication with developers
	Auto-layout and component creation in Figma
	Analyzing data in Dovetail
